### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The abstract of the disclosure is objected to because it is not limited to a single paragraph. Accordingly, the abstract has been rewritten as follows:

### **ABSTRACT OF THE DISCLOSURE**

In a laser irradiation system, since a heavy scanning stage moves at a high speed, vibration is caused. When the vibration is transmitted to a vibration isolator where an optical system that forms a beam spot and a system are mounted, a laser irradiation track formed on a substrate, which is not linear any more, is undulating in a reflection of the vibration. It is one of the objects of the present invention to suppress the undulation of the irradiation tracks due to such vibration. A light-shielding film 134 is provided over a semiconductor film 133 that is to be irradiated. When the light-shielding film 134 is provided, a portion of the incident beam, which has a low energy density, is shielded. As described above, providing the light-shielding film 134 makes it possible to enlarge a grain size in the semiconductor film without forming the state similar to the crystals formed in the case of performing laser crystallization with an excimer laser. It is preferable that the light-shielding film 134 be as thin as possible in order to minimize an effect of diffraction.

Figure 3 was selected as the drawing to be printed on the front page of the patent, so the reference numbers used in the abstract have been changed to those used in Figure 3.

***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

None of the references of record teach or suggest irradiating a laser beam to a semiconductor film through an opening in a light-shielding film formed on the semiconductor film while relatively moving the substrate in a direction of a minor axis of a beam spot of the laser beam.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to M. Wilczewski whose telephone number is (571) 272-1849. The examiner can normally be reached on Monday-Thursday.
